SUMMARY

Product Designer with 3.6+ years of experience taking AI-native enterprise SaaS products from research and strategy through high-fidelity prototyping to production-ready interfaces. Skilled in Figma, design systems, and turning complex enterprise workflows into intuitive, WCAG-compliant experiences, backed by hands-on front-end knowledge that keeps designs feasible and handoffs seamless. Delivered measurable impact across global products, including a 95% increase in customer satisfaction, a 60% reduction in manual processing effort, and a 90% cut in workflow times.

SKILLS

Product Design & UX: User Research, Usability Testing, Wireframing, User Flows, Personas, Journey Mapping, Information Architecture (IA), Interaction Design, Visual Design, Design Systems, Rapid Prototyping, Micro-interactions, Motion Design, WCAG Accessibility, Responsive Design, Complex Data Visualization, A/B Testing

Design Tools: Figma (Advanced), Figma AI, FigJam, Adobe XD, Sketch, Photoshop, Framer, Webflow, Lottie, Miro, Lovable, Storybook

Front-End & Development: React, Next.js, TypeScript, JavaScript, HTML5, CSS3, Java, Python, JSF, PrimeFaces, Git, REST APIs, RBAC

AI & Emerging Tech: AI-Native Product Design, AI Copilot & Chat Interfaces, Prompt Engineering (Claude, ChatGPT, Gemini, Copilot, Cursor, Midjourney)

Collaboration & Delivery: Agile/Scrum, Design Thinking, SDLC, Design-to-Dev Handoff, Multi-Tenant SaaS, Stakeholder Management, Cross-Functional Leadership, Jira, Confluence

EXPERIENCE

AI Specialist, Product Designer & Developer | Gintic.ai

Apr 2026 – Present

- Designed and developed multi-tenant enterprise frontends in Next.js, React, and TypeScript for an AI-powered accounts payable platform, shipping deployments for **3 major clients** (Flipkart, Curefoods, Livspace) with **300+** features merged to production
- Engineered an AI invoice copilot with Oracle ERP integration, permission-gated line edits, and click-to-highlight PDF previews, reducing manual invoice processing effort by **60%** for enterprise accounting teams
- Built vendor reconciliation, match agent, and data agent workflows from high-fidelity Figma specs into pixel-accurate production UI, improving task turnaround time by **40%**
- Led the Curefoods platform migration, rebuilding authentication with OTP onboarding and UUID-based RBAC while hardening security against VAPT findings, closing **100%** of reported vulnerabilities
- Delivered the entire Livspace application from Figma design to a working product in **8 days**, building spec-compliant navigation and an AI chat interface that accelerated client onboarding by **70%**

UI/UX Designer & Developer | Smiths Detection

Jan 2023 – Apr 2026

- Streamlined the user experience across **3 major enterprise projects** by translating user research and data insights into strategic, data-driven UI decisions
- Engineered a developer-grade Service Console dashboard for airport technicians that reduced maintenance time by **80%** and improved diagnostic accuracy
- Executed a full UI redesign using Java, HTML, and CSS, driving a **95%** increase in positive user feedback in FY25 and lifting global customer satisfaction by **85%**
- Created high-fidelity prototypes with advanced micro-interactions and motion design to simulate real-time data flows and validate end-to-end user journeys
- Conducted **3 usability tests** and shipped feedback-driven enhancements that decreased customer support requests by **70%**
- Led client-facing engagements in Wiesbaden, Germany, running product demos, feedback sessions, and end-user training for airport personnel

PERSONAL PROJECTS

- Build Your Own Company (B2B SaaS):** Engineered a software procurement platform with an interactive 3D service configurator that simplifies complex agency hiring
- Bestanswers.ai (GenAI Multi-Agent System):** Architected a multi-agent consensus engine on Llama 3 running a real-time debate between 4 AI personas to reduce hallucinations
- Bar App (Fintech Investment):** Designed a mobile-first micro-investing platform for digital gold/silver with accessible, goal-based savings dashboards
